

Policy #: 453.12

SCHOOL DISTRICT OF WEBSTER

Date Adopted: May 17, 2011

Date Revised:

Policy Title: Management of Concussion in School Setting

Webster School District is committed to ensuring the safety of students while at school and when participating in any school-sponsored events. Webster School District recognizes that educating key individuals, including students, student-athletes, parents, coaches, school administrators, athletic directors, teachers, athletic trainers, physicians, and other health care providers about prevention and early recognition of concussions remains the most important component of improving the care of students with concussions.

The Webster School District is aware that head injuries, including concussions, can happen to any student, not just an athlete. The Webster School District has developed procedures to address head injuries that occur during the school day, during school sponsored events and during school sponsored athletic events. Additionally, the Webster School District is committed to providing students who have experienced a concussion, a plan to ease back into school life, "return to learn".

- The Webster School District will incorporate the guidelines put forth by the Wisconsin School Health Services Project
